

AI-Generated Self-Portraits

Time: 2019

Material: digital w/ programming

paper referenced: "UGATIT: Unsupervised Generative Attentional Networks with Adaptive Layer-Instance Normalization for Image-to-Image Translation" (2019)

dataset used:

- animeface-character-dataset
- selfie-dataset

Different people have different perspective on things. This is literally how an Artificial Intelligence sees me.

I implemented methods in an unpublished paper in Computer Vision (CV) to train and deploy my neuronal network. The resulting images are generated by code. (training process shown on the network architecture diagrams)

network architecture: Generative Adversarial Network (GAN)

network_architecture: Convolutional Neural Networks

AI as My Brush: Starry Town

Time: 2019

Material: digital w/ programming

paper_referenced: Image Style Transfer Using Convolutional Neural Networks (CVPR 2016)

Walking in an old town under the sunset,
shops lit up into the bustle,
only with the stars still.

This is an old town: People who live outside want to get in, while people who live inside want to get out.

AI as My Brush: Water Township

BeestBot

Time: 2018-2019

Material: Steel, Motors, Servos, Rubber Bands, Sensors, 3D printed materials...

Function:

- This autonomous robot is capable of picking and transporting "gold" and "silver" minerals; lifting itself onto a "rocket"; and landing to the "moon".

Technology:

- I deployed machine learning for "minerals" detection
- Motor Gear Ratio
-

3D printed Item

BeestBot Logo

#² Fake News (by AI)

Time: 2019

Material: digital

paper_referenced: "Generative
Adversarial Networks" (2016)

dataset_used: celebA

These paintings done by my AI algorithms was generated completely from random noises inputs, which means that these people do not exist on earth.

I used this piece to show my classmates about the power of AI and how the growing technology can create problems like "DeepFake crisis" in our society.

Species of Flowers

Time: 2017

Material: 100% nature, (not from concentration)

Collecting flowers in the spring was my past hobby to enjoy and study the nature. I identified and classified 80+ different species of flowers in Maryland. Now as I walk in the forest in the spring, my memories of the past flood out from my heart.

Hunger Is Not a Game

Time: 2018

Material: digital

Length: 1 min

tools-used: Adobe AfterEffects, Adobe Illustrator

I animated this Public Service Announcement about how the growing world population and unbalanced food distribution could potentially cause hunger in certain countries. Our team proposed two solutions: creating food bank and promote women's education.

World hunger again on the rise, driven by conflict and climate change, new UN report says

815 million people now hungry – Millions of children at risk from malnutrition

News release

15 SEPTEMBER 2017 | ROME – After steadily declining for over a decade, global hunger is on the rise again, affecting 815 million people in 2016, or 11 per cent of the world's population.

KokiCraft Game Server

(Game Design, Pixel Art, Interface Design)

Time: 2019

Material: digital w/ programming, PhotoShop

Graphical Summary of My Skills and Activities

Robotics

Robotics is a conglomeration of Engineering, Computer Science, and Artificial Intelligence. AI is its brain whereas engineering creates its body.

Artificial Intelligence for Robotics: Reinforcement Learning on Robotics

Stanford Pre-Collegiate Summer Institutes Artificial Intelligence for Robots

Art

What is art? To me, art is a way of thinking. It is a representation of the nature, a dimensional interpretations, a sensitivity to shapes and color. Art is an idea, an idea that brings big innovations.

PSA Animation: Hunger is not a Game

PSA - Hunger is not a game Video: PSA Animation Time: 2017 Material: After Effects

Miscellaneous

In my sophomore year, I cooperated with my friends and made this PSA animation for worldofbillions.org competition, a student Video Contest. The video focuses on making global awareness of hunger and raising several solutions to this problem. My teammates focused on creating the scripts while I animated the video.

Webpage Design

Time: 2018
Material: digital w/ programming

tools-used: ruby, html, css, jekyll
link: <https://chenhanke.me>

This general web page coded by myself showcases every aspect of me from AI Research, Robotics, to Art and Game Designs.

Responsive UI Design: automatic resize on phones

Brownie UI: A Personal Tech-Webpage

Time: 2017-now

Material: html, css

link: <https://www.kokecacao.me>

This geek-style minimalistic design showcases my personal values toward lives to my friends. The use of line, shape, hue, and saturation gives the viewer a sense of safety.

0x05 Global Deployment — Sounds big, but it means social-network

(details shown)

A screenshot of a web browser displaying a personal webpage. The page has a light beige background with a circular profile picture of a character in the top right. The main content area features a section titled "🎮| Game Design" with the text "KokiCraft is my first work for game design Tt". To the right, there is a large title "Koke Cacao" and a subtitle "Wanting to know everything, but time is limited — [2018/07/18]". On the left side of the main content, there is a sidebar with links to various social media platforms like GitHub, Bilibili, Instagram, etc. At the bottom of the page, there is a footer section with "Other Languages" links and a "MyProperties" block containing a list of interests and quirks.

Other Languages: [简体中文]; [English]; [繁體中文]; [日本語]; (WARNING: English is the most up-to-date version.)

My other websites: [RoboticsClub]; [ArtClub]; [Blog]; [Website];

emmmmmmmmm...
MyProperties: Quantum delay experiment's strange bug | Extremely Introvert, but talkative with people who share same interests with me | Love Science | A Nerd | Tech Person who love watching anime | Almost never play video games | Yan Text(`~`*) | Sublime Text is the world-best-looking text editor (╯#-皿-)╯~~(still learning the useless Vim) | Pytorch is the best framework in ML | Using Ubuntu as desktop | Occam's razor is the fundamental theory of SCIENCE!

This MeaningOfLife.java file is where all my power came from:

```
private boolean stillAlive = true;  
private int lastSecond = 1928891298174;  
private void live(Energy e) {  
    while(stillAlive) {  
        if ((this.getDream != null) && (lastSecond > 0)) {  
            this.getDream().createArtificialIdiot();  
        }  
        lastSecond++;  
    }  
}
```

Class Logo Design

Time: 2016

Material: digital

My design of the logo for my class includes the meaning of "growth", "love", and "peace". The class adopted my design onto our class t-shirt.
